5. Testing Requirements

Compare the two, preferably side-by-side in your monitor window. Are there any differences? Comment on whether or not you see any differences, what they are, whether it be color, fonts, rounded corners if used, etc. Save as a PDF named lastname_testing (i.e. breaux_testing.pdf).

When comparing the two pages that I've created, I surprisingly see no differences between the two side by side. Colors are the same, fonts, and styles. I've had trouble with the favicon with both, so I don't believe they are showing up, but everything else seems linked.
